DTU Compute

Department of Applied Mathematics and Computer Science

Course Objectives

The objective of this course is to provide a hollistic introduction to the basic concepts of computer security, which will provide the necessary basis for ongoing scholarly studies and starting professional activities in the area of computer security

- No chain is stronger than its weakest link so all aspects that impact on security must be examined
- Our intention is to cover topics broadly, but not in great detail
  - Coverage should be sufficient to allow ongoing scholarly studies in computer security (possible courses listed on the next slide)
  - Coverage should be sufficient to allow a motivated engineer to learn more about computer security form self-study and on the job learning
- A few important topics are not covered at all
  - Some will be covered in later courses for those who continue

Course Overview

- **Lectures:** Room: LY.306.034.AUD and LY.306.035.AUD
- **Exercises:** Allocated Rooms:
  - ***LY.303A.47.CR (Only allocated for 02339),***
  - *LY.308.001.CR,*
  - *LY.308.009.CR,*
  - *LY.308.017.CR,*
  - *LY.308.101.EXP,*
  - *LY.308.109.EXP,*
  - *LY.308.117.EXP,*
  - *LY.308.127.CR*

Examination

– Final exam (multiple choice)
  - *No AID- No notes, no books etc*
  - *2 Hours Exam*

Exam Information

- **Written examination**: 18th December

  The exact time and rooms will be announced by the exam office shortly before exams.

- **Course number:** 02270/02339
- **Course name:** Cybersecurity Fundamentals
- **Aids allowed:** No aids (Only pencil/erasers are allowed, no printout, no notes, nothing,….)
- **Exam duration:** 2 hours
- **Total Number of Questions:** Between 20-30
- **Format:** The exam is multiple choice. All questions have four possible answers marked by the letters A, B, C, and D as well as the answer "Don't know" marked by the letter E(Option E is here for a technical reason). A correct answer gives 1 points, a wrong answer gives 0 point, and "Don't know" (E) gives 0 points.
- **Weighting:** Exam questions are weighted equally.

Technical University of Denmark

Written examination: 19 December 2025

Course number: 02270

Course name: Cybersecurity Fundamentals

Aids allowed: No aids

Exam duration: 2 hours

Format: The exam is multiple choice. All questions have four possible answers marked by the letters A, B, C, and D as well as the answer "Don't know" marked by the letter E. A correct answer gives 3 points, a wrong answer gives 0 point, and "Don't know" (E) gives 0 points.

Weighting: Exam questions are weighted equally.

Answers: This exam only allows for physical hand-in. Select **one** answer per exam question by completely filling in a circle (e.g. Ⓐ Ⓑ ● Ⓓ Ⓔ) using a black/dark pencil (do **not** use a pen). Do **not** use checkmarks or crosses to indicate your desired answer. To change an answer erase the previously marked answer using an eraser and fill another circle leaving only one clearly selected answer. You **must** answer E if you do not wish to provide an answer for a question.

Exam Tips

Preparation

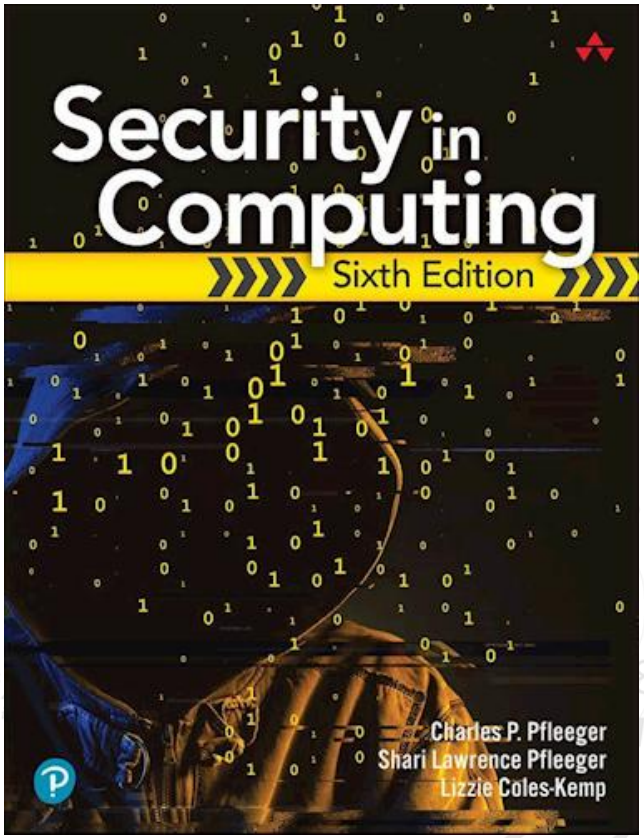

- Go through slides and understand topics well.
- Refer to books for a better understanding of topics.
- Practice sample questions given after the lectures for better understanding of exam patterns.

Exam:

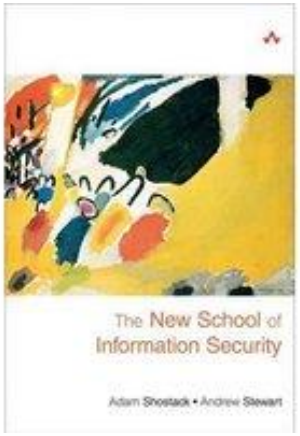

- Use only pencil. Students fill the MCQ sheet with pencil and do corrections by eraser.
- Read Carefully twice the questions in the exam.
